Office Action Summary	Application No. 10/626,510	Applicant(s) RANGANATHAN ET AL.	
	Examiner Noah Kamen	Art Unit 3747	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The IDS lists "view A" as being prior art and the applicant has submitted this view as one of the figures in the disclosure. The applicant is directed to relabel this figure as being on sheet number 3 and the figure as "figure 6". Under the figure include the title "Prior Art".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 5-7 are rejected under 35 U.S.C. 102(a) as being anticipated by McCarthy, Jr. et al (6698924).

Figures 1-3 show a venturi that would inherently suppress cavitations because it has all of the recited structure including a converging nozzle at D9, a diffuser pipe at D12, and a head pipe at D15. In regard to claims 6 and 7, the diffuser pipe has a range of cross-sections that encompass from 2 to 3.5 times larger than that of the nozzle outlet. All recitations regarding pumps and coolant systems are merely statements of intended use.

In claim 6, the use of "about" in conjunction with a range should be avoided because the actual range is not clearly set forth.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3747

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over McCarthy, Jr. et al. While the venturi is seen to be of a single piece, to make anything out of a plurality of pieces where there is an advantage in cost, manufacturing, maintenance, would have been obvious to one of ordinary skill in the art as a matter of engineering practice (See *In re Dulberg* 289 F.2d 522, 523). In regard to claims 3 and 4, while the device McCarthy, Jr. et al use threaded ports for securing pipes, the use of flanges for coupling conduits is notoriously well known.

Note, there is no antecedent basis for "the aspirator" in claim 3

Allowable Subject Matter

Claim 8 is allowed.
